

5. The apparatus of claim 2, wherein the advertised configuration capability changing means changes the advertised capability configuration of the first station in the second configuration datum to indicate a highest common denominator configuration, if any, in which both the first station and the second station, as indicated by the first configuration datum, are capable of operating.

93 Cond.

6. The apparatus of claim 1, wherein said first configuration capability indicates a protocol by which the second station is capable of operating and a technology which the second station is capable of supporting.

R E M A R K S

Claim 1 has been amended, and claims 2-6 have been added, to recite additional aspects of Applicant's invention.

The specification has been amended to include the Brief Description of the Figures.

Respectfully submitted,  
LIMBACH & LIMBACH
